JESHWANTH CHINTALAPUDI

Sathupally, Telangana-507303 | +(91)-8919485128 | jeshwanth.ch2@gmail.com | LinkedIn | GitHub

Dedicated data analyst skilled in Python, SQL, and ETL. Expertise in optimizing workflows and transforming data into actionable insights. Transformed datasets into insights that resulted in over 20% improvement in decision-making efficiency across projects.

EXPERIENCE

MedTourEasy *(Virtual Internship)* *March 2025 – April 2025*
Data Analytics Trainee *Remote*

- Worked with **Google Cloud Platform (GCP) and BigQuery** to query and manage datasets containing 800+ chemical components.
- Applied advanced **Excel data transformation** and **filtering techniques** to clean datasets, reducing data preparation time by **30%**.
- Built **interactive Power BI dashboards** to analyze medical data trends (Diabetes analysis), helping stakeholders quickly identify patterns and make informed decisions **20% faster**.
- Collaborated with a **4-member remote analytics team**, effectively communicating findings and ensuring **100% on-time delivery** of the final presentation.

PROJECTS

Netflix Movies Data Analysis | *SQL, Google Sheets* *[GitHub Link]*

- Analyzed over 1,000 movie entries, optimizing **data management** and identifying trends in ratings, duration, and release patterns.
- Applied **problem-solving** techniques to execute **data cleaning** queries that handled NULL values in the 'Director' column, ensuring **99%** data consistency.
- Performed complex SQL queries and optimized statements to improve data accuracy by 8% and enhance analytical reliability.
- Segmented content by duration and genre and formulated data-driven strategies projected to drive a **7% uplift** in user engagement.

Pie Bakery Performance Analysis | *Power BI, Google Sheets* *[GitHub Link]*

- Designed a **Star Schema data model** to enhance reporting efficiency and improve query performance by **20%**.
- Created dashboards comparing sales and waste to identify high-loss product categories.
- Recommended pricing and inventory strategies that led to a **5% revenue increase** and **12% reduction in inventory costs**..
- Analyzed customer segments with **95% accuracy** to support targeted marketing campaigns.

Customer Churn Analysis | *Python, Power BI* *[GitHub Link]*

- Leveraged **Python** (**Pandas**) to clean and preprocess raw customer data, effectively **handling missing values** and outliers to ensure data integrity.
- Built an interactive **Power BI dashboard** to analyze churn behavior across **6,687 customers**, identifying an overall churn rate of **26.86%**.
- Applied **critical thinking** to identify top churn factors, pinpointing competitor offers (18.8%) and senior customer attrition as key drivers for targeted retention strategies.

TECHNICAL SKILLS

Programming & Databases: Python (Pandas), SQL (MySQL), Google BigQuery (GCP).
Data Visualization: Power BI (DAX), Tableau, Google Sheets (Pivot Tables), Advanced Excel (Power Query, VLOOKUP).
Core Competencies: ETL Processes, Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning, A/B Testing Concepts.
Developer Tools: VS Code, Jupyter Notebook, Google Colab, Git, GitHub.

EDUCATION

Bachelor of Technology – Electronics and Communication Engineering, *July 2020 – October 2024*
Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology, *Chennai.* *CGPA: 7.73*

CERTIFICATIONS

SQL Certification: Basic to Advanced - *Geekster* *2024*
Data Analytics Course - *Geekster* *2025*
Excel Skills for Business - *Goldman Sachs Forage* *2024*
Getting Started with Data - *IBM* *2024*
